

Study Number

Procedure Number

Date of Procedure (DD/MMM/YYYY) //

Date of Admission (DD/MMM/YYYY) //

Date of Discharge (DD/MMM/YYYY) //

- Procedure Type**
- AVSD Repair
 - PA Band
 - Norwood Procedure
 - Glenn Procedure
 - Hemi-Fontan
 - Fontan Procedure
 - One and Half Ventricle Repair
 - Heart Transplant
 - Subsequent AVSD Procedures
 - Hybrid Procedure
 - Interval Procedure

- Is this the first procedure during this admission?**
- No
 - Yes
 - Not in Report
 - Not Applicable

Intended Treatment Strategy _____

Weight (kg) _____ **Height (cm)** _____ **BSA (m2)** _____

- On Cardiopulmonary Bypass?** No Yes Yes, but unspecified
Elapsed Time on Bypass (min) _____

Cooling Temperature (C) _____

- Cross Clamp/Ischemic Time?** No Yes Yes, but unspecified
Total Cross Clamp/Ischemic Time (min) _____

- Cerebral Perfusion used?** No Yes Yes, but unspecified
Duration of Cerebral Perfusion (min) _____

- Total Circulatory Arrest** No Yes Yes, but unspecified
Total Circulatory Arrest Time (min) _____

- If Sternotomy, was sternum closed?** No Yes Yes, but unspecified
If delayed closure, date of closure (DD/MMM/YYYY): //

PREOPERATIVE FACTORS (select all that apply)

- 10 = No preoperative factors identified
- 200 = Cardio-pulmonary resuscitation
- 210 = Preoperative complete AV block
- 220 = Preoperative/Preprocedural mechanical circulatory support (IABP, VAD, ECMO, or CPS)
- 230 = Shock, Persistent at time of surgery
- 240 = Shock, Resolved at time of surgery
- 250 = Diabetes mellitus, Insulin dependent
- 260 = Diabetes mellitus, Non-insulin dependent
- 270 = Hypothyroidism
- 280 = Currently taking steroids as treatment for adrenal insufficiency
- 290 = Currently taking steroids for any reason other than treatment of adrenal insufficiency
- 295 = Colostomy present
- 300 = Enterostomy of small intestine present
- 305 = Esophagostomy present
- 307 = Gastrostomy present
- 310 = Hepatic dysfunction
- 320 = Necrotizing entero-colitis, Treated medically
- 330 = Necrotizing entero-colitis, Treated surgically
- 340 = Coagulation disorder, Hypercoagulable state
- 350 = Coagulation disorder, Hypocoagulable state not secondary to medication (intrinsic hypocoagulable state)
- 360 = Coagulation disorder, Hypocoagulable state secondary to medication
- 370 = Endocarditis
- 380 = Sepsis
- 390 = Sepsis with positive blood culture
- 400 = Preoperative neurological deficit
- 410 = Seizure during lifetime
- 420 = Seizure within 48 hours prior to surgery
- 430 = Stroke, CVA, or Intracranial hemorrhage > Grade 2 during lifetime
- 440 = Stroke, CVA, or Intracranial hemorrhage > Grade 2 within 48 hours prior to surgery
- 450 = Renal dysfunction
- 460 = Renal failure requiring dialysis
- 470 = Mechanical ventilation to treat cardiorespiratory failure
- 480 = Respiratory Syncytial Virus
- 490 = Single lung
- 500 = Tracheostomy present
- 777 = Other preoperative factors
